Strands Key:
 NO = Number and Operations
 A = Algebra
 G = Geometry

M = Measurement
 DAP = Data Analysis and Probability
 PS = Problem Solving
 CM = Communication

RP = Reasoning and Proof
 C = Connections
 R = Representation

Lesson 70 409

LESSON PRACTICE

Practice set Find the fraction name for 1 used to make each equivalent fraction.

$$\frac{1}{2} = \frac{1}{2} \cdot \frac{2}{2} \quad \frac{1}{4} = \frac{1}{4} \cdot \frac{4}{4}$$

$$\frac{1}{3} = \frac{1}{3} \cdot \frac{3}{3} \quad \frac{1}{10} = \frac{1}{10} \cdot \frac{10}{10}$$

Find the numerator that completes each equivalent fraction.

$$\frac{1}{2} = \frac{3}{6} \quad \frac{2}{5} = \frac{4}{10} \quad \frac{1}{3} = \frac{2}{6}$$

k. Write a fraction equal to $\frac{1}{2}$ that has a denominator of 6.
 Then write a fraction equal to $\frac{1}{2}$ that has a denominator of 6. What is the sum of the two fractions you made?

l. Write $\frac{1}{2}$ as a fraction with a denominator of 100. Then write that fraction as a percent.

MIXED PRACTICE

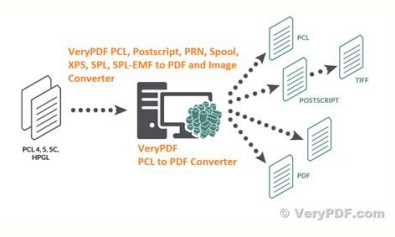

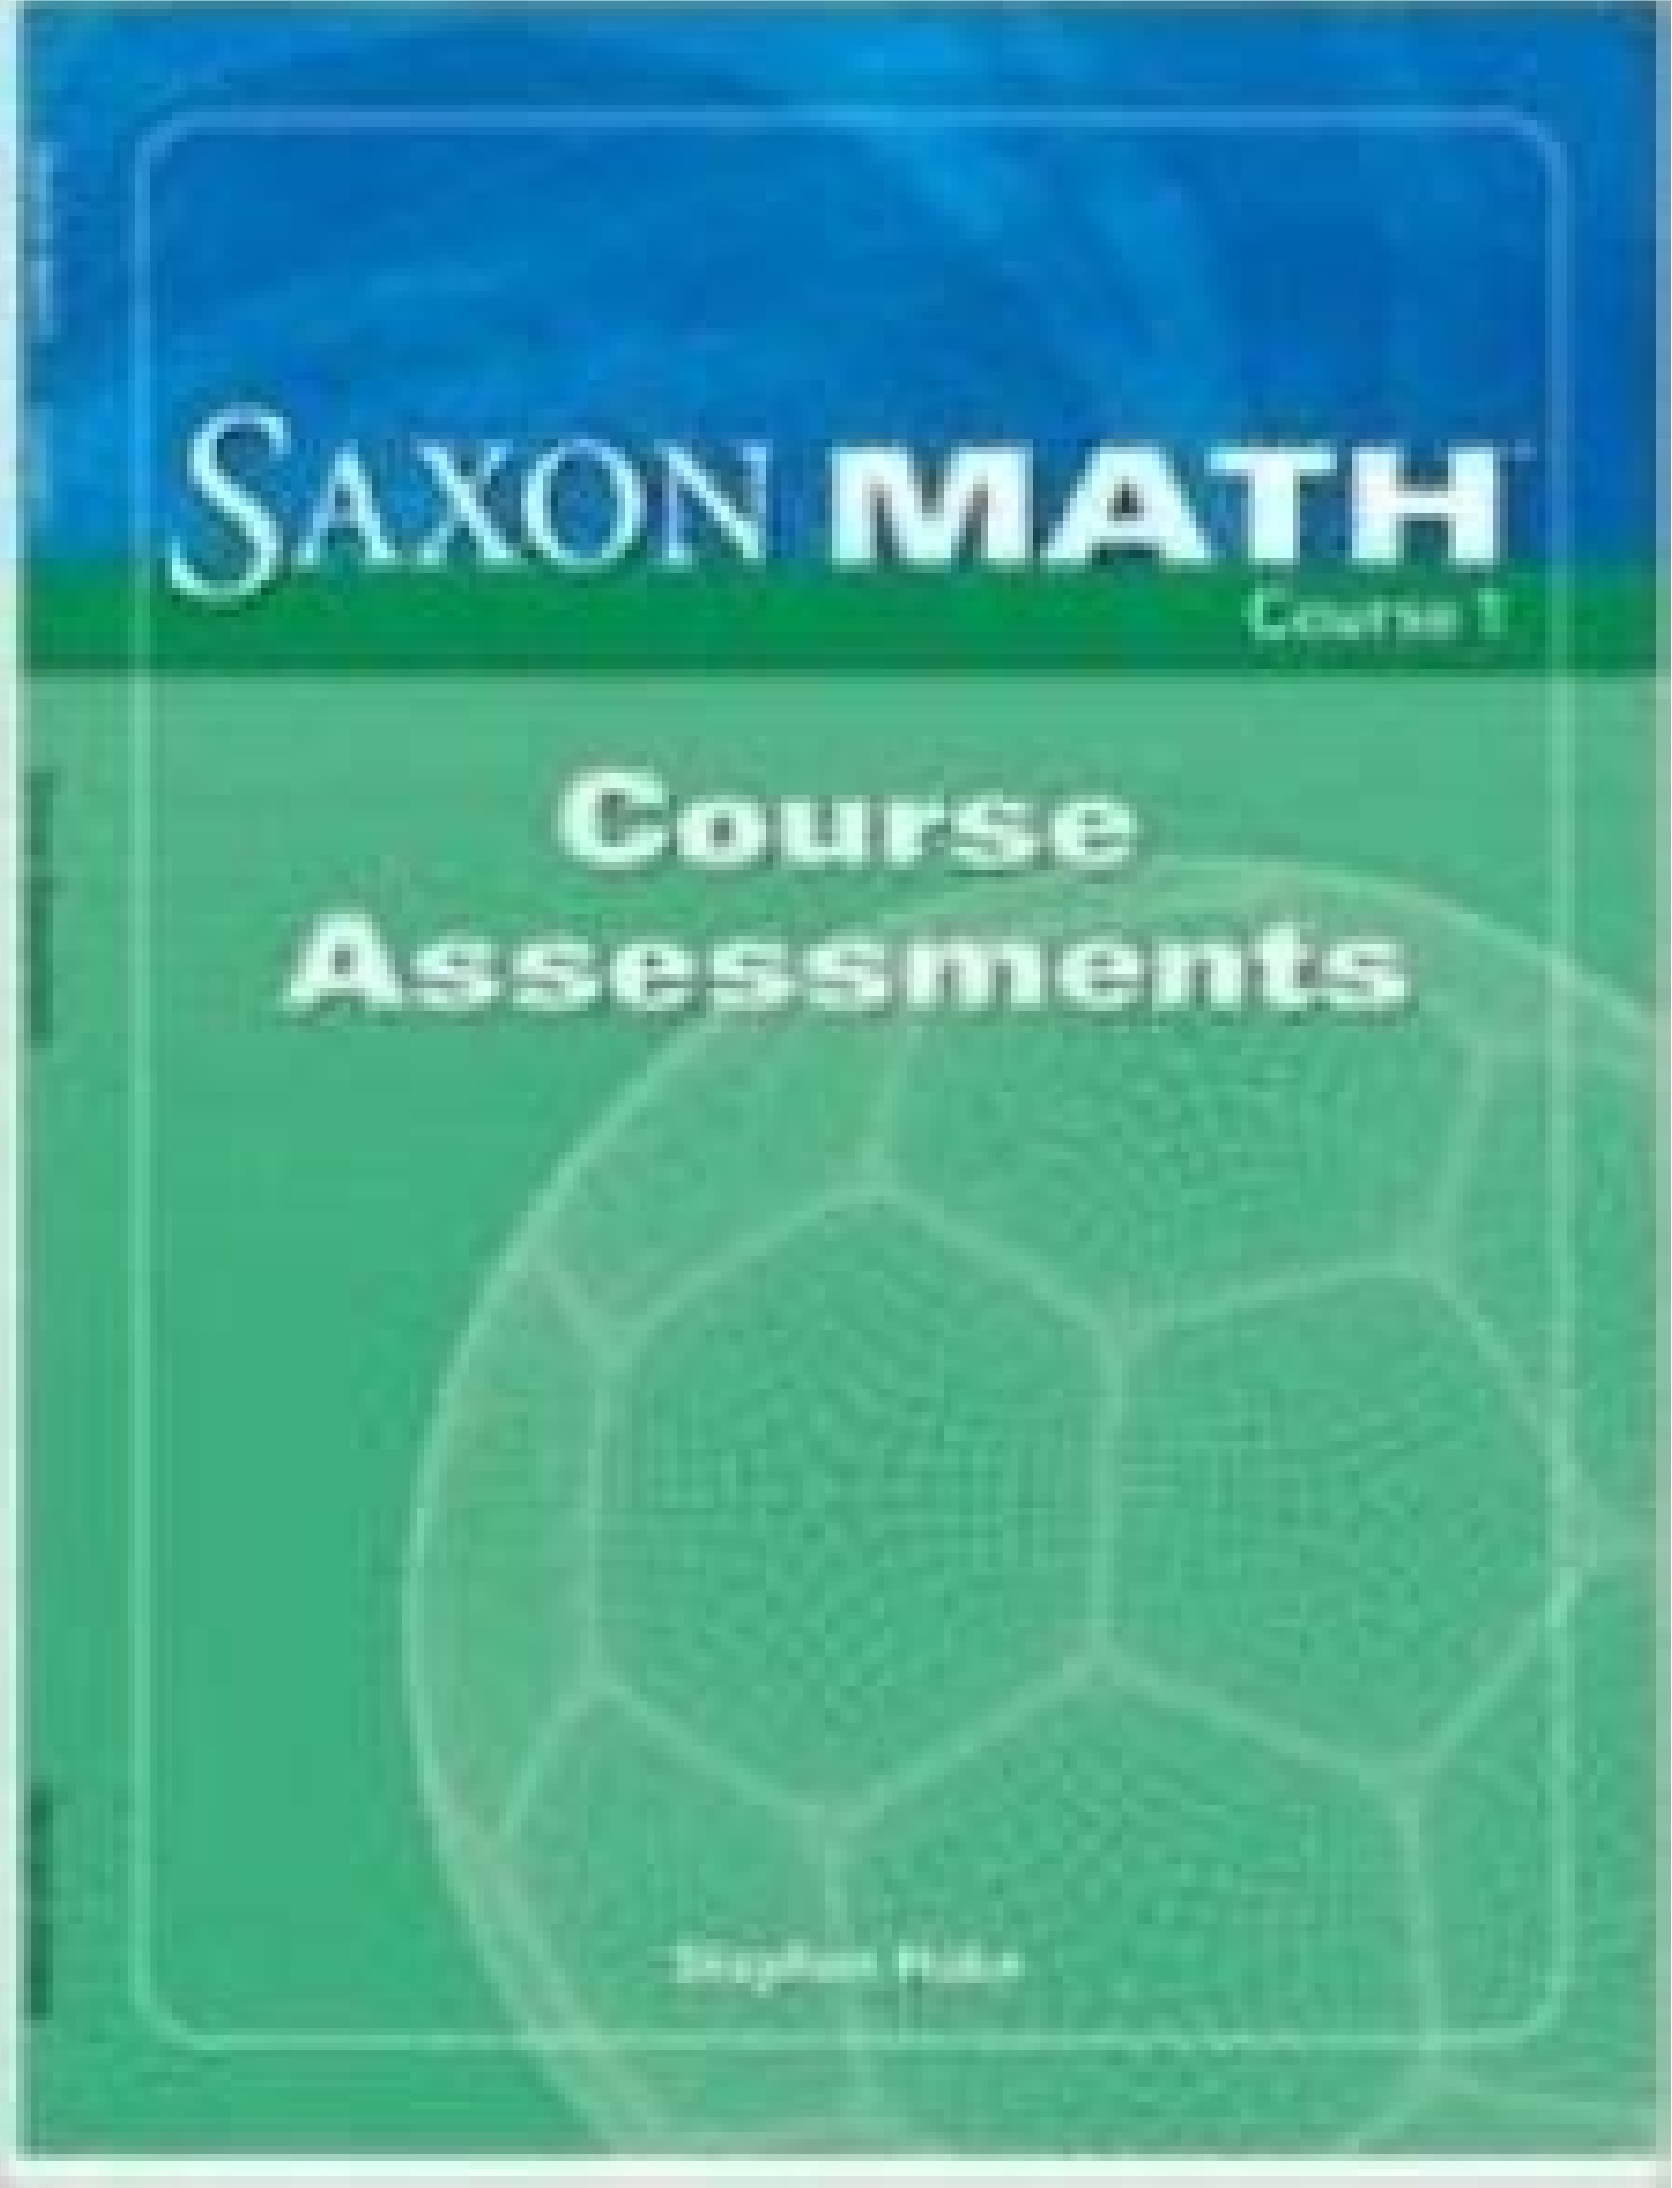

Problem set

1. Mr. MacDonell bought 1 ton of hay for his cows. Caroline Every day Caroline uses 50 pounds of hay. At this rate how long will the hay last?

2. A playpen is measured with a deck-the-hill and soiled bed. A playpen is about 11 feet long. One and one-half feet is how many inches?

3. Sam bought 3 shirts for his business store for \$6.00 each. He sold them for \$10.00 each. How much profit did Sam make on all 3 shirts? (Sam's profit for each shirt can be found by subtracting how much Sam paid from the selling price.)

4. Add the decimal number ten and fifteen hundredths to twenty-nine and eighty-nine hundredths. Use words to name the sum.

Or Or what happens if there's a situation when you need to spend money to make a much more significant amount of money?All of a sudden, your options are limited and you may be forced to secure a much more expensive loan. For example, if you are going for an architecture job, you may need more algebra than someone who is applying for a retail clerk position. Digital Vision/Digital Vision/Getty Images Get a good's night's rest and eat breakfast on the day of the test. These tests are instrumental for positions in fields like accounting where math is required to serve clients or the employer. These are the math skills that are the foundation for other math-related tasks. Try to finish problems you can see easily relate to job functions you would perform, regardless of their level. Tips Check with your potential employer about the use of calculators on the test. Therefore, it's likely that your prospective employers will make you take employment math tests as part of the application and interview process. You can spend less time studying for problems that won't count as much toward your score. These don't provide any answers to the test questions, but they can help you choose how to solve a given equation. How do you finance the purchase?A. A A A The manufacturer offers a 2 percent discount if you pay upfront, so you pay \$98,000 in cash.B. A A A The manufacturer offers 0 percent financing for 12 months, giving you a monthly payment of \$8,333.C. A A A You obtain a five-year note with a 3 percent interest rate. A 3 percent interest rate is more than manageable, especially for clients that tell tales of interest rates topping 20 percent. What happens if there's some kind of emergency that also requires a significant outlay? Refresh your basic math skills such as working with multiplication or percentages, estimating and reading tables. That's the happy exact opposite of a death spiral.
